A fully independent private dialysis clinic. Comfortable environment with comprehensive infection control measures.
A trusted medical facility affiliated with Chiba University Hospital.
Just a 3-minute walk from Chiba Station, with 45 parking spaces available.

“Aiming to provide an even higher level of comfort”

To ensure you can undergo your thrice-weekly dialysis treatments with peace of mind and comfort, we provide the most ideal treatment environment for you.

“Private single rooms” and “Independent air conditioning” are the most effective infection prevention measures.

MEMBER

All dialysis rooms at our clinic are private single rooms, each equipped with independent air conditioning. Receiving treatment in a private room is a key measure for preventing COVID-19 and influenza.

“Reasons to Choose Our Clinic”

“Comfortable Treatment Environment”

“Private Dialysis Rooms”

All our dialysis rooms are private, designed to respect your privacy and reduce stress during treatment. Each room features independent air conditioning, reliable Wi-Fi, and thoughtful amenities to provide a comfortable environment and peace of mind.

“Independent Air Conditioning”

“Thorough Infection Control”

“Hemodialysis patients have reduced immunity, making infections like COVID-19 or influenza potentially severe. Our private dialysis rooms, each with independent air conditioning, are designed to provide a safe environment and minimize infection risk.

Safe and reassuring care for sudden changes in condition

“CT scans available anytime”

Patients undergoing dialysis are at higher risk of developing complications. At our clinic, if your condition worsens, you can have same-day CT scans, endoscopy, as well as abdominal and cardiac ultrasounds. MRI is also available at a clinic just a 2-minute walk away.

While many dialysis clinics can usually only provide blood tests, X-rays, and ECGs, our examination system is comparable to that of a large hospital.

“A trusted clinic affiliated with Chiba University Hospital”

Our clinic is recognized as an affiliated medical facility of Chiba University Hospital. The director has received high acclaim for contributions to regional healthcare, education, and academic activities, and also serves as a part-time lecturer at Chiba University School of Medicine.

If hospitalization, surgery, or advanced examinations are required, patients can be referred to Chiba University Hospital or other affiliated medical institutions within Chiba Prefecture.

“Full-Time Nephrology Specialist”

If kidney function or urine test results are abnormal, consult us promptly. Same-day follow-up tests and imaging (CT or ultrasound) are available.

Early treatment can help slow chronic kidney disease and postpone dialysis.

“3 minutes on foot from Chiba Station”

Just a 3-minute walk from Chiba Station, our clinic is convenient for train, monorail, or bus travelers. Make the most of your thrice-weekly dialysis days by visiting before or after work or shopping.

“Ample Parking”

Our clinic, just in front of Chiba Station, provides 45 free parking spaces for a worry-free visit.

“Clinic Facilities”

“Private Dialysis Rooms”

In our hotel-style dialysis rooms, you can receive treatment comfortably. In a quiet environment, you can work on your computer, read, and make effective use of your time. We do not charge extra for private rooms.

Private Dialysis Rooms

Receive treatment in a quiet private room that prioritizes your privacy.

Climate Control

Independent air conditioning in every room allows personalized temperature control for your comfort.

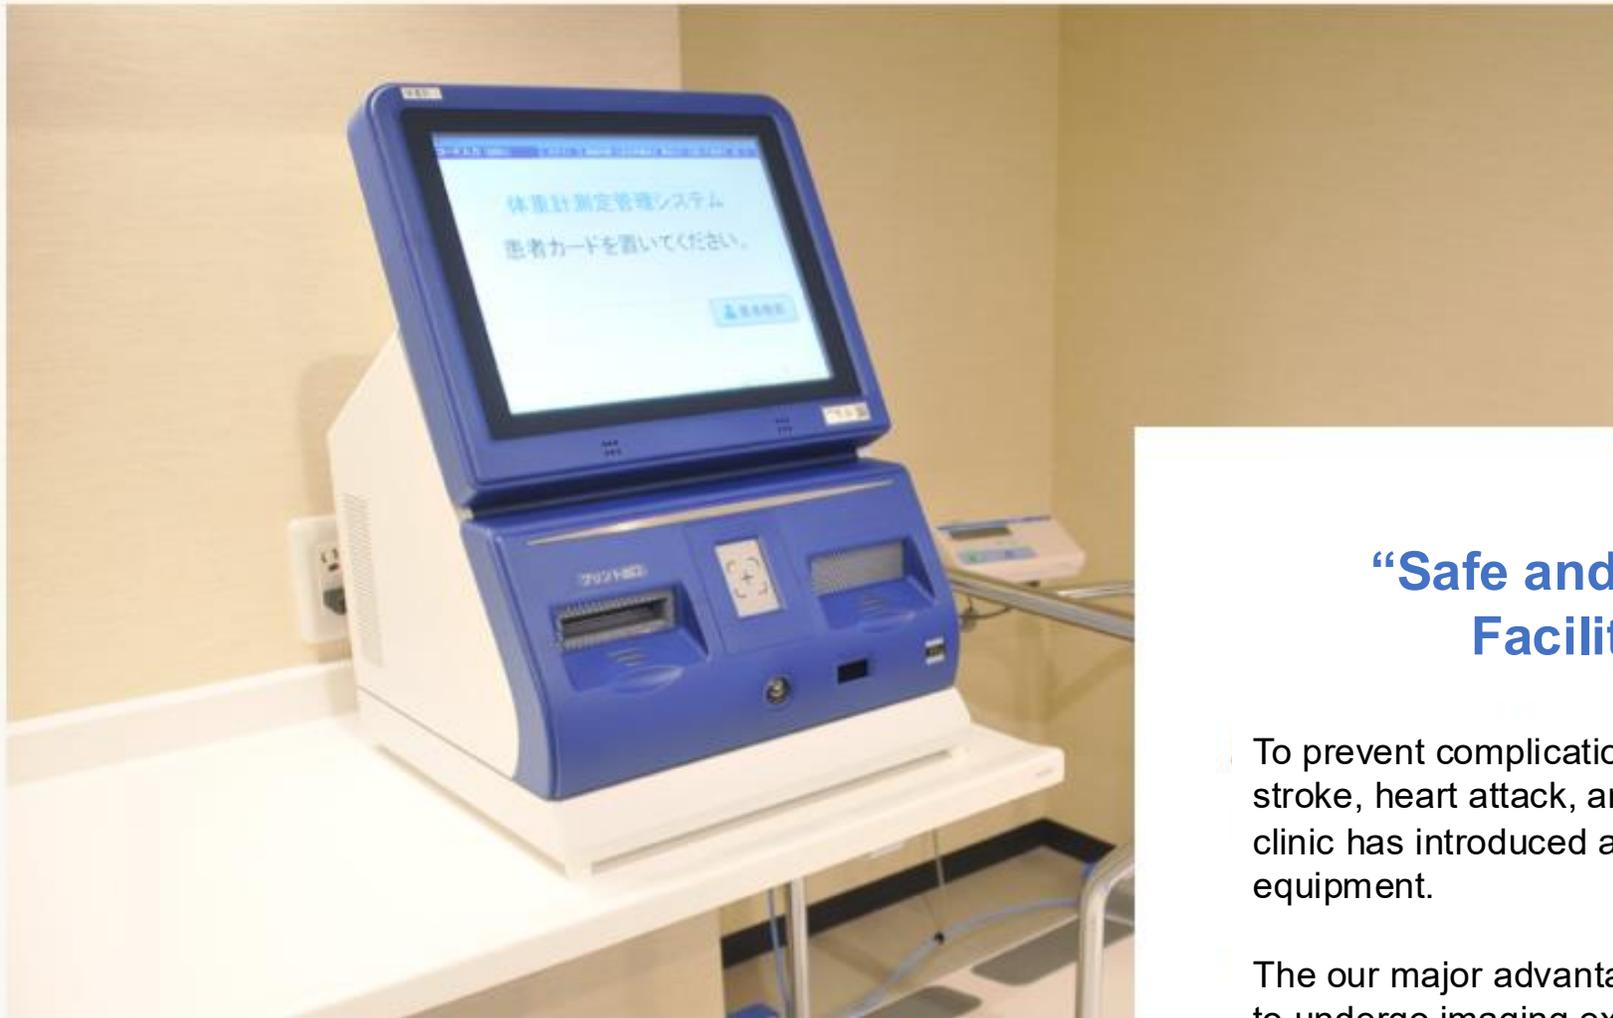

Free Wi-Fi

Enjoy reliable Wi-Fi in every dialysis room for your laptop or smartphone.

Soft Indirect Lighting

Our dialysis rooms are designed with elegant, warm lighting to help you feel relaxed and comfortable during treatment.

Dialysis Network System

Wheelchair-accessible weight scales and integrated dialysis equipment with electronic medical records help prevent operational errors.

“Safe and Modern Facilities”

To prevent complications such as stroke, heart attack, and cancer, our clinic has introduced advanced medical equipment.

The our major advantages is the ability to undergo imaging examinations right here during routine visits.

Endoscopy Room

Trans-nasal endoscopy is available for less discomfort, and oral endoscopy is also offered.

LED-equipped devices provide clear, high-quality imaging.

CT Scan Room

Our compact CT scanner enables high-speed, wide-range imaging.

3D scans are also available.

Physiology Lab

Ultrasound is available for the abdomen, heart, breasts, thyroid, neck and leg vessels, and shunt vessels.

Dialysis Reception

Dedicated dialysis reception for a smooth start to your treatment.

Lounge

Patients and companions can unwind in our dedicated lounge before and after treatment.

Parking

The clinic offers a free parking lot with 45 spaces. You can visit us by car without worrying about parking fees.

Collaboration with Nearby Hospitals

Blue Bird Clinic Chiba is recognized as an affiliated facility of Chiba University Hospital. The director serves as a part-time lecturer at Chiba University School of Medicine in recognition of contributions to community healthcare, education, and academic activities. If hospitalization, surgery, or advanced examinations are required, patients can be referred to Chiba University Hospital or other hospitals within and outside Chiba Prefecture.

Dialysis for Travelers in Japan

If you are traveling or on a business trip to Tokyo, Narita, or Chiba, please feel free to contact us. This service is also available to foreign visitors.

Safe and Reliable Dialysis for Travelers

Starting dialysis often brings many lifestyle and dietary restrictions, and some patients may give up traveling. However, travel can help refresh the mind and body and maintain a positive attitude toward treatment. Our clinic offers temporary dialysis for travelers, including foreign visitors, making it easy to continue treatment while on the go.
